**Date: 30/08/2020**

**Respected Sir**,

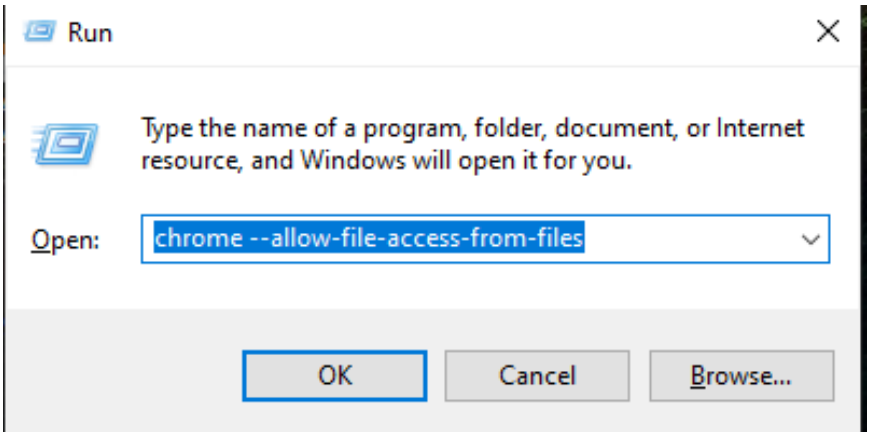
I am very grateful for this opportunity to be given an assignment from PlotMyData. I have done this assignment with the best of my knowledge. I have attached the html files and screen shots with this assignment. Kindly review them Sir.

Thanking You

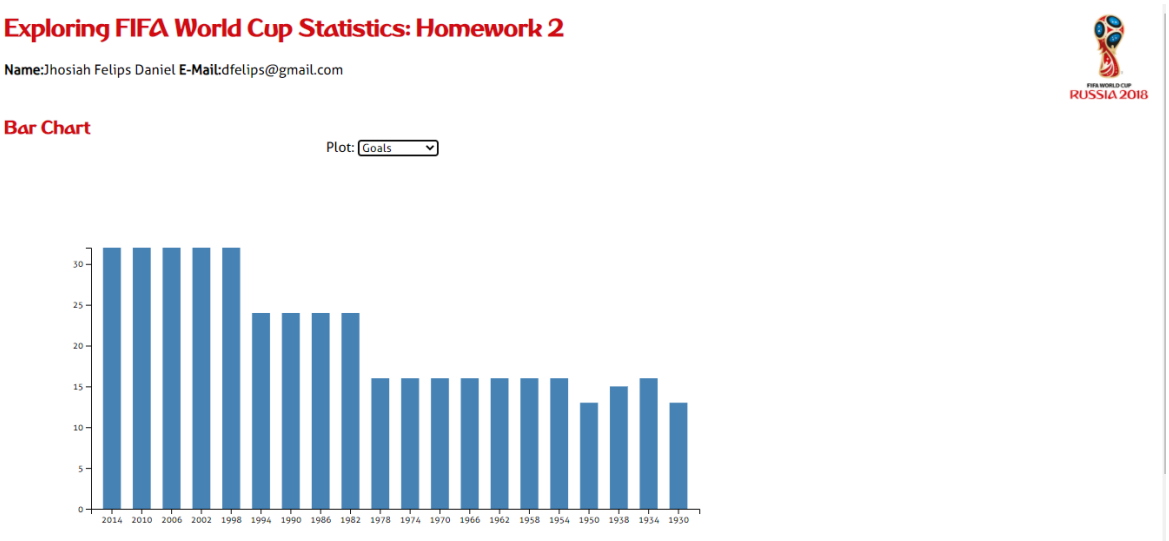
Yours Sincerely,

Jhosiah Felips Daniel

**To allow chrome to access the files, I used this command. This was in effect to the problem I encountered due the CORS Policy.**



**Screen shot of the output from the "test2.html" file (THE LEARNING FILE). For learning purpose, I created this bar chart initially – unlike "test3.html", this does feature bars that will change in height based on the dropdown selections.**



**Screen shot of the output from the "test3.html" file (THE MAIN FILE). This chart features bars that change in height according to the dropdown choices. Sir, I have also attached a video clip displaying the behavior of the file when run.**

**Thank you once again Sir for this opportunity. Eagerly waiting for your acknowledgement.**
